

Sharing a common architectural language with NAFCO's SteelRidge Center in Birmingham, the new NAFCO local headquarters in Cullman will seamlessly pair corporate offices with an industrial metal fabrication facility. Our design approach allows for corporate offices, open shared spaces (indoor and outdoor), dining facilities, and locker rooms where individuals from every department can gather and feel part of one team. With covered balconies, a large, shared terrace, and open entries, corporate administration meets expert craftsmanship. For materials, we will rely on structural steel, decorative metal panels in bold colors, and glass to ensure that NAFCO's Cullman facility is easily identifiable and distinctive in a landscape of manufacturing facilities.

PROJECT DETAILS

- 14,700 sf
- \$5-6,000,000 (Est.)
- Corporate Office Space & Industrial Manufacturing
- Structural steel, metal panels, glass
