

Friends & Family Health Center needed a design for their chiropractic practice that could breathe new life into an outdated, existing office building. We worked with the clients to design a space for the practice that projects an atmosphere of holistic well-being from the moment a patient walks through the door. Applying natural materials and finishes helped allow healing to take center stage in this beautifully restored space.

## PROJECT DETAILS

- 7,220 sf
- \$450,000 Renovation
- Open and welcoming
- Natural materials and finishes
