

The mission of the Naaman Clinic is to heal and transform the skin through dermatological surgical procedures and advanced techniques. Our collaboration resulted in an architectural design concept that mirrors the various tones, textures, and colors of our skin. Our palette of materials and finishes included slate, wood, and paneling with the strikingly angled entry and overhangs representing the level of detail and precision performed by the skilled surgical practitioners of Naaman Clinic.

PROJECT DETAILS

- 10,070 sf
- \$4,200,000
- Surgical Suites
- Slate, wood, paneling
